Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Abstract

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 39-41, 43-47 and 49-50 are rejected under 35 U.S.C. 102(b) as being anticipated by Leake (5,624,119).

Regarding claims 39-41, 43-47 and 49-50, Leake teaches a method of playing a game that comprises the steps of accepting a wager; displaying a matrix of $m \times n$ dimensions; displaying main symbols that are randomly generated images; comparing the main symbols to the player symbols; indicating any matches; and declaring a winning outcome (abstract; Fig. 6 and Fig. 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29-38, 42 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Leake** (5,624,119) in view of **Makovic** et al (4,443,012).

Regarding claims 29-38, 42 and 48, Leake teaches a method of playing a game that comprises the steps of accepting a wager; displaying a matrix of m x n dimensions; displaying main symbols that are randomly generated images; comparing the mains symbols to the player symbols; indicating any matches; and declaring a winning outcome (abstract; Fig. 6 and Fig. 1). While Leake teaches variations in the presentation of symbol images (different shape sizes of images- see Fig. 1; Fig. 3 and 5), Leake lacks disclosing the images being that of die. However, in an analogous gaming system that utilizes indicia on cards, Makovic teaches this feature. It would have been obvious to a person of ordinary skill in the art at the time of the invention to include this feature as taught by Leake in Makovic to further provide variety in the system; thus, resulting in increased popularity and sales of the game.
